1. Key assignment

The heat pump manager is operated using 6 keys:

 **Modus** Briefly touch

Change the operating mode by pushing the key once or repeatedly:
The filled square in the upper right corner of the display indicates the current operating mode.

Symbol	Operating mode	Denotation
	Auto	Fully automatic control of the entire heat pump heating system
	Vacation	Temperature lowering and hot water block for an adjustable time period (in days)
	Party	For overriding programmed temperature lowering for an adjustable time period (in hours)
	Heat generator 2	Heat pump blocking; Heating and domestic hot water preparation through the second heat source (e.g. oil heater) or the electric heating elements
	Summer	Domestic hot water and swimming pool water preparation; Heating operation blocked
	Cooling	Cooling operation cannot be activated on all heat pumps

When the key is pressed, the selected operating mode will be shown as text in the display.
The selected operating mode will be activated after approx. 10 seconds.
